

Erratum

The Thurrock Public Health report presented to council on 23 November contained two erroneous figures.

It should have read

4.9 per 1,000 (not per cent) of 15-24 year olds in Thurrock use opiate and/or crack cocaine

And

5.11 per 1,000 (not per cent) of young people (9-17 year olds) are currently receiving drug or alcohol treatment
