--------------	---------------------	----------------

The application is also accompanied by:

- Planning Statement
- Design and Access Statement
- Air Quality Report
- Archaeology Report
- BREEAM Pre-Assessment Report and Energy Strategy
- Drainage Statement
- Ecological Statement
- Environmental Noise Assessment
- Landscape and Visual Impact Assessment
- Lighting Assessment
- Transport Assessment
- Tenant Travel Plan

Applicant:
SEGRO Plc

Validated:
14 June 2018
Date of expiry:
27 September 2018

Recommendation: Approve subject to conditions and obligations.

This application is being referred to Planning Committee determination as the proposed development is similar to a recently determined application at this site.

1.0 BACKGROUND AND DESCRIPTION OF PROPOSAL

1.1 The key elements of the proposals are set out in the table below:

Site Area (Gross)	7.9 ha
Use	Warehouse and Distribution Centre (Class B8)
Height	16.7m
Floorspace	29,475m ²
Employment	Up to a maximum of 300 full time staff per shift over 5 shift periods over a 24 hour operational use
Loading Bays	99 HGV docking points
Parking	HGV Parking: 84 spaces Car Parking: 327 Cycle Parking: 50

- | | |
|--|--|
| | |
|--|--|
- 1.2 Full planning permission is sought for the erection a new warehouse and distribution centre (B8 Use Class), with ancillary offices uses (B1 Use Class), two associated gate house buildings, and two welfare hubs. The proposal seeks a 24 hour use.

Access

- 1.3 The proposal would result in the creation of a new access point from Purfleet Road and a 'left-in' access from London Road. The 'left in' access would be used by HGV's accessing the site for parking and loading purposes. An internal HGV circulation route would pass around the north elevation of the building with HGV's exiting the site at the new bellmouth junction onto Purfleet Road.

Layout

- 1.4 The proposed warehouse building would be centrally located within the site with loading bays located on all three sides of the building, these would be the north, south and west elevations. Around the building a hardstanding area would be created which would provide turning areas and HGV parking located to the south and western areas of the building along with an area identified for 9 HGV spaces would be located to the east of the building. In the south east corner of the building a 3 storey office block would be created nearest the internal road at the bellmouth junction onto Purfleet Road. To the east elevation of the proposed warehouse a three storey multi-storey car park would be created with 327 spaces. An additional 24 motorcycle and 50 cycle spaces would be created alongside the office building. To the north west and south western corners of the building two welfare buildings would be constructed. At the 'left-in' access a gatehouse would be sited and to the east of the multi-storey car park another gatehouse building would be sited. Sprinkler tanks would be sited to the north eastern corner of the building. An electricity sub station would be sited towards the south east corner of the proposed warehouse building.

Scale and Design

- 1.5 The proposed warehouse would be 16.8m high and would be of a typical modern warehouse design with horizontal metal cladding proposed to the elevations, including the multi-storey car park. The only windows to the building would be located in the south and east corners of the building to serve the office, and in the North West and south west welfare building elements of the proposal. The north, south and west elevations would have loading bays to each of these elevations.

Landscaping

- 1.6 Around the site boundaries and within this site area a large area of landscaping is proposed including attenuation ponds towards the south boundary for surface water drainage. A landscape bund would be created adjacent to the eastern site boundary and would be approximately 10m above existing ground levels.

Planning Obligations

- 1.7 The following planning obligations are offered:

- Travel Plan – submission for approval, implementation and review of a Travel Plan. Payment of the Council's Travel Plan review fees of £500;
- Vehicle Monitoring Scheme – submission for approval, implementation and maintenance of a Vehicle Monitoring Scheme. Carrying out of relevant corrective highways measures;
- Bus Services Contribution – financial contribution of £150,000 (indexed) three months prior to occupation and a further contribution of £150,000 (indexed) on occupation of 50% of the floorspace.

- 1.8 It should be noted that the extant permission [12/00862/OUT and 17/00587/REM] were subject to the same planning obligations as offered above. In addition to these additional highway works were included in the s106 legal agreement to the outline planning permission and within a s278 legal agreement [pursuant to the Highways Act]. The additional highway works have been implemented and details of these works are listed below:

- realignment of the Purfleet Road and closure of part of Purfleet Road as a result of the realignment works;
- installation of a new bellmouth access from Purfleet Road into the site;
- provision of a refuse storage collection area from Purfleet Road;
- installation of a new road traffic junction with traffic lights between Purfleet Road and London Road;
- installation of a 'left-in' access for HGV's from London Road;
- widening of London Road; and
- various access and footpath and cycleway improvements.

2.0 SITE DESCRIPTION

- 2.1 The site is a triangular-shaped plot of land totalling 7.9 hectares in size. The site is located on the north-western side of Purfleet Road, with the A13 trunk road and the A1306 London Road forming the other boundaries of the site. The A13, which forms the northern boundary of the site, is within a cutting and, therefore, is below

ground levels on the site. The site has a frontage to Purfleet Road of some 160m and a frontage to London Road of approximately 360m.

- 2.2 The site is not currently used and comprises rough, open grassland with small shrubs, isolated trees and other vegetation forming the boundaries of the site. A drainage ditch is located within the site adjacent to the majority of the London Road frontage. Levels across the site are generally flat, albeit with a gentle fall from the A13 boundary towards the Purfleet Road / London Road junction. Parts of the site closest to London Road and Purfleet Road are located within flood zones 2 and 3 (medium and high probability). In the immediate post-war period, the northern part of the site was used as a sand and ballast pit. During the 1960's this part of the site was infilled with household refuse, inert waste and non-hazardous commercial waste. Infilling ceased at the end of the 1960's.
- 2.3 To the south-east of the site, on the opposite side of Purfleet Road, are mainly residential properties comprising semi-detached bungalows and two-storey family housing. At the junction of London Road and Purfleet Road, and immediately adjacent to the site, is the Tunnel Garage site which originally operated as a petrol filling station and is now used for the storage and repair of commercial vehicles. To the south-west of the site on London Road is the Purfleet Industrial Park which includes a range of large warehouse buildings, small business and light industrial uses and open storage uses. The A13 trunk road lies adjacent to the northern boundary of the site and the off-slip from the trunk road joins the A1306 London Road at a roundabout junction (Wennington Interchange) immediately to the north-west of the site.
- 2.4 In the wider area surrounding the application site, a sports ground and clubhouse is located to the south-east to the rear of the dwellings along Purfleet Road. On the northern side of the A13 to the west of Purfleet Road is open land. To the south of the Purfleet Industrial Park is the RSPB nature reserve and visitor centre at Aveley Marshes.

3.0 RELEVANT PLANNING HISTORY

- 3.1 The following table provides the relevant planning history:

Reference	Description	Decision
08/00858/TTGOUT	Outline planning application for the redevelopment of the site for employment use totalling 38,686sqm with means of access and quantum of development to be approved. All other matters to be reserved.	Approved 20.06.2011

12/00862/OUT	Outline planning application for the redevelopment of the site for employment use total 38,686sqm (41,541 sq ft) with means of access and quantum of development to be approved. All other matters to be reserved.	Approved 07.05.2014
17/00587/REM	Application for approval of reserved matters (appearance, landscaping, layout and scale) following outline planning permission ref. 12/00862/OUT (Redevelopment of the site for employment use total 38,686sq.m. with means of access and quantum of development to be approved. All other matters to be reserved).	Approved 22.08.2017
18/00847/SCR	EIA Screening Opinion in accordance with Regulation 6 of the Town and Country Planning (Environmental Impact Assessment) Regulations 2017 for the proposed development of 19,410 square metres (sqm) gross external area (GEA) of storage and distribution uses (Use Class B8) with 2,650sqm (GEA) of ancillary offices (Use Class B1), 695sqm (GEA) of welfare units (Use Class B8), 70sqm (GEA) of gatehouses (Use Class B8), a 100sqm (GEA) pump house and a 6,550sqm (GEA) car park, access, drainage, landscaping, plant and other associated works	No EIA required 05.07.2018

- 3.2 In 2008 an outline planning application was submitted to the former Thurrock Development Corporation proposing the development of the site with a mix of employment generating uses [08/00858/TTGOUT]. Following referral of the application to the Secretary of State, [as the site was in the Green Belt at that point] and the completion of a S.106 legal agreement, conditional planning permission was granted in June 2011. No reserved matters applications were submitted and the planning permission lapsed.
- 3.3 The outline permission in 2014 [12/00862/OUT] was followed by the reserved matters permission [17/00857/REM] which permitted two warehouse buildings on the site and this still remains a live consent until 22 August 2019. This represents the fall back position for the applicant.

3.4 To assist in comparing the extant permission and the current application the table below illustrates the differences as follows:

	12/00862/OUT & 17/00587/REM	Current Application
Floor space	34,145m ²	29,475m ²
Height	Unit 1 – 18m Unit 2 – 17.2	16.7m
HGV Parking	100	84
Car Parking	332	327
Cycle Parking	160	50
Distance from properties on Purfleet Road	39m	68m

4.0 CONSULTATION AND REPRESENTATIONS

4.1 Detailed below is a summary of the consultation responses received. The full version of each consultation response can be viewed on the Council's website via public access at the following link: www.thurrock.gov.uk/planning

4.2 PUBLICITY:

This application has been advertised by way of individual neighbour notification letters, press advert and public site notice which has been displayed nearby.

2 representations received, 1 in support, and 2 raising the following concerns:

- Possible excessive noise from lorries
- Air quality from roads and industry
- Traffic emissions

4.3 ANGLIAN WATER:

No objection subject to a condition requiring agreement of a surface water strategy.

4.4 CADENT GAS:

No objection.

4.5 EMERGENCY PLANNER:

No objection subject to a condition requiring a Flood Warning and Evacuation Plan [FWEP].

4.6 ENVIRONMENT AGENCY:

No objection subject to conditions surface water infiltration, contamination and remediation, and piling and borehole details.

4.7 ENVIRONMENTAL HEALTH:

No objection subject to the air quality and noise mitigation measures being implemented through planning conditions. There is a need for a Construction Environmental Management Plan and contaminated land conditions.

4.8 ESSEX COUNTY COUNCIL ARCHAEOLOGY:

No objections as the previous application completed the archaeological work on site and therefore no conditions are required.

4.9 ESSEX FIELD CLUB:

Object on the basis of inadequate information within the application on ecology.

4.10 FLOOD RISK ADVISOR:

Objection.

4.11 HEALTH AND WELLBEING:

No objection but possible mitigation may be required through the use of sound barriers for protecting existing residents.

4.12 HIGHWAYS:

No objection subject to conditions and planning obligations through a s106 agreement.

4.13 HIGHWAYS ENGLAND:

No objection subject to a planning obligation to secure vehicle monitoring strategy.

4.14 LANDSCAPE AND ECOLOGY ADVISOR:

No objection.

4.15 LONDON BOROUGH OF HAVERING:

No response.

4.16 NATURAL ENGLAND:

No objection.

4.17 TRANSPORT FOR LONDON:

No objection.

4.18 TRAVEL PLAN CO-ORDINATOR:

No objection subject to amendments being made to the Travel Plan.

5.0 POLICY CONTEXT**5.1 National Planning Policy Framework**

The revised NPPF was published on 24 July 2018 and sets out the government's planning policies. Paragraph 14 of the Framework sets out a presumption in favour of sustainable development. Paragraph 2 of the Framework confirms the tests in s.38 (6) of the Planning and Compulsory Purchase Act 2004 and s.70 of the Town and Country Planning Act 1990 and that the Framework is a material consideration in planning decisions. Paragraph 11 states that in assessing and determining development proposals, local planning authorities should apply the presumption in favour of sustainable development. The following headings and content of the NPPF are relevant to the consideration of the current proposals:

- 2. Achieving sustainable development
- 4. Decision-making
- 6. Building a strong, competitive economy
- 9. Promoting sustainable transport
- 10. Supporting high quality communications infrastructure
- 12. Achieving well-designed places
- 14. Meeting the challenge of climate change, flooding and coastal change
- 15. Conserving and enhancing the natural environment

5.2 Planning Policy Guidance

In March 2014 the Department for Communities and Local Government (DCLG) launched its planning practice guidance web-based resource. This was

accompanied by a Written Ministerial Statement which includes a list of the previous planning policy guidance documents cancelled when the NPPF was launched. PPG contains a range of subject areas, with each area containing several subtopics. Those of particular relevance to the determination of this planning application comprise:

- Air quality
- Climate change
- Design
- Determining a planning application
- Flood Risk and Coastal Change
- Land affected by contamination
- Land Stability
- Light pollution
- Natural Environment
- Noise
- Planning obligations
- Renewable and low carbon energy
- Transport evidence bases in plan making and decision taking
- Travel plans, transport assessments and statements in decision-taking
- Use of Planning Conditions

5.3 Local Planning Policy Thurrock Local Development Framework (2015)

The “Core Strategy and Policies for Management of Development Focused Review: Consistency with National Planning Policy Framework Focused Review” was adopted by Council on the 28th February 2015. The following policies apply to the proposals:

OVERARCHING SUSTAINABLE DEVELOPMENT POLICY

- OSDP1 (Promotion of Sustainable Growth and Regeneration in Thurrock)¹

SPATIAL POLICIES

- CSSP2 (Sustainable Employment Growth)
- CSSP3 (Infrastructure)

THEMATIC POLICIES

- CSTP6 (Strategic Employment Provision)
- CSTP14 (Transport in the Thurrock Urban Area)³
- CSTP15 (Transport in Greater Thurrock)³
- CSTP16 (National and Regional Transport Networks)

- CSTP17 (Strategic Freight Movement and Access to Ports)
- CSTP19 (Biodiversity)
- CSTP22 (Thurrock Design)
- CSTP23 (Thurrock Character and Distinctiveness)²
- CSTP25 (Addressing Climate Change)²
- CSTP26 (Renewable or Low-Carbon Energy Generation)²
- CSTP27 (Management and Reduction of Flood Risk)²

POLICIES FOR MANAGEMENT OF DEVELOPMENT

- PMD1 (Minimising Pollution and Impacts on Amenity)²
- PMD2 (Design and Layout)²
- PMD7 (Biodiversity, Geological Conservation and Development)²
- PMD8 (Parking Standards)³
- PMD9 (Road Network Hierarchy)
- PMD10 (Transport Assessments and Travel Plans)²
- PMD11 (Freight Movement)
- PMD12 (Sustainable Buildings)²
- PMD13 (Decentralised, Renewable and Low Carbon Energy Generation)
- PMD15 (Flood Risk Assessment)²
- PMD16 (Developer Contributions)²

[Footnote: 1New Policy inserted by the Focused Review of the LDF Core Strategy. 2Wording of LDF-CS Policy and forward amended either in part or in full by the Focused Review of the LDF Core Strategy. 3Wording of forward to LDF-CS Policy amended either in part or in full by the Focused Review of the LDF Core Strategy].

5.4 Thurrock Local Plan

In February 2014 the Council embarked on the preparation of a new Local Plan for the Borough. Between February and April 2016 the Council consulted formally on an Issues and Options (Stage 1) document and simultaneously undertook a 'Call for Sites' exercise. It is currently anticipated that consultation on an Issues and Options (Stage 2 Spatial Options and Sites) document will be undertaken in 2018.

5.5 Thurrock Design Strategy

In March 2017 the Council launched the Thurrock Design Strategy. The Design Strategy sets out the main design principles to be used by applicants for all new development in Thurrock. The Design Strategy is a supplementary planning document (SPD) which supports policies in the adopted Core Strategy.

6.0 ASSESSMENT

6.1 The main issues for consideration in this case are:

- I. Principle of the development
- II. Design and Layout and Impact upon the Area
- III. Traffic Impact, Access and Car Parking
- IV. Flood Risk and Drainage
- V. Ecology
- VI. Air Quality and Noise
- VII. Effect on Neighbouring Properties
- VIII. Land Contamination and Ground Works
- IX. Energy and Sustainable Buildings
- X. Viability and Planning Obligations
- XI. Sustainability
- XII. Other Matters

I. PRINCIPLE OF THE DEVELOPMENT

6.2 The site does not form part of any land use allocation within the LDF Proposals Map but the outline planning permission references [08/00858/TTGOUT and 12/00862/OUT] have already established that the principle of development on this is acceptable. Strategically, policy CSSP2 '*promotes and supports economic development in the Key Strategic Economic Hubs*' in the Borough, as does policy CSTP6, and whilst this site does not form allocated Employment Land as one of the identified Key Strategic Economic Hubs it is located within close proximity of the Key Strategic Economic Hubs in Purfleet with the nearest of these allocations located to the western side of London Road.

6.3 Paragraph 82 of the NPPF advises that '*Planning policies and decisions should recognise and address the specific locational requirements of different sectors. This includes making provision for clusters or networks of knowledge and data-driven, creative or high technology industries; and for storage and distribution operations at a variety of scales and in suitably accessible locations*'. This site's location, adjacent to the A13 Wennington interchange, provides good vehicular access to the strategic road network for the proposed storage and distribution use [Class B8].

II. DESIGN AND LAYOUT AND IMPACT UPON THE AREA

6.4 The approved reserved matters scheme [17/00857/REM] was for two large warehouse type buildings but this application seeks only one large warehouse building. In layout terms the siting of the building is shown to be centrally positioned in the site. When compared to the approved reserved matters a similar level of hardstandings would be created. The surrounding hardstandings would incorporate

HGV loading areas, HGV parking and car parking. The plans indicate a multi-storey car park to the east of the building and the closest building element to the nearby residential properties. The proposed layout of the development is considered acceptable in regard to the impact upon the site's surroundings.

- 6.5 The elevation plans show three sides of loading bays [north, south and west elevations] associated with the future proposed storage and distribution use of the building. The proposed office and entrance to the building would project from the south east corner of the building and be nearest the bellmouth junction onto Purfleet Road for staff and visitors to the site. The proposed multi-storey car park would be located to the eastern side of the building and partly screened behind the proposed office part of the development and by the landscaping bund to the eastern part of the site. In terms of scale the proposed building would be 16.7m high which would be lower than the 18m high building approved through 17/00857/REM. In terms of materials, the proposed building would be a metal clad warehouse building incorporating red and white colour horizontal banding and a shallow pitched roof. There are no objections to the use of such materials or the design of the building.
- 6.6 The application includes a detailed landscaping scheme, similar to the approved reserved matters scheme. The details show that soft landscaping through shrubs and trees will be planted around the boundaries of the site. In particular a landscaping bund is proposed to the eastern side of the site which would act as a visual screen when viewed from Purfleet Road and the residential properties therein. The Council's Landscape and Ecology Advisor has no objections to the landscaping scheme submitted with this application.
- 6.7 The applicant's Landscape and Visual Impact Assessment LVIA assesses the sensitivity of the site and its capacity for change. Taking into account this assessment it is considered that the proposed development would not adversely affect the landscape character as the proposal would result in a change from the existing appearance of the site to an extension of the neighbouring Purfleet Industrial Landscape Character Area. Visually the appearance of the site and the landscape of the site would change as a result of the development but in light of the already consented scheme the visual impacts raise no objection.
- 6.8 It is considered that the design, layout and impact upon the surrounding area from the development would be acceptable with regard to LDF policies CSTP22, CSTP23 and PMD2, subject to the implementation of the proposed landscaping scheme for the development.

III. TRAFFIC IMPACT, ACCESS AND CAR PARKING

- 6.9 In terms of location, the site is located adjacent to the Wennington interchange and therefore provides direct access onto the A13 and is within close proximity of junction 30 of the M25/A13 interchange for access to the wider motorway network, which is relevant as the proposed storage and distribution use would give rise to HGV movements as a primary part of the site’s use. The site is 2km from Purfleet town centre but can easily be accessed via private vehicles, footpaths, cycleways and public transport, as there is access to two bus routes that serve the area [no.’s 11 and 44] and the nearest railway station at Purfleet is 2.2km south of the site, which is also served by the no.11 bus service. The site is therefore considered sustainable in location terms.
- 6.10 The proposal would result in the creation of a new access point from Purfleet Road and 'left-in' HGV access from London Road. The 'left in' access would be used by HGV’s accessing the site for parking and loading purposes. An internal HGV circulation route would circulate around the northern elevation of the proposed building with HGV’s leaving the site at the new bellmouth junction turning right onto Purfleet Road, as weight restrictions on the road network prevent HGV’s from turning left into Purfleet Road in this location. The Council’s Highways Officer raises no objections to the access arrangements which are considered acceptable with regard to policy PMD9 and paragraph 108 of the NPPF.
- 6.11 It should be noted that the access arrangements are broadly the same as the extant permission. Paragraph 1.8 of this report sets out various highway works that have implemented since the outline permission was granted, including the realignment of Purfleet Road, new traffic light junction onto London Road, along with various footpath and cycleway improvements and widening of London Road.
- 6.12 The applicant’s Transport Assessment [TA] demonstrates that that extant permission allows for more HGV traffic movements than the current application as shown below:

	HGV Vehicle Movements	
	12/00862/OUT & 17/00587/REM	Current Application
Morning Peak [07:30-08:30]	120	32
Evening Peak [16:45-17:45]	78	45

- 6.13 The predicted traffic generation for staff would be 32 two movements during the morning peak hour [07:30-08:30] and 45 two way movements during the evening peak hour [16:45-17:45]. The construction phase of the development would also involve traffic generation but routing and amenity requirements could be suitably

controlled via a Construction Environmental Management Plan which could be conditioned in the event of a grant of planning permission. Importantly, the TA demonstrates that the proposal would not result in any severe impact upon the local and strategic highway network and the proposal would involve less vehicle movements than the consented outline permission. The Council’s Highways Officer and Highways England raise no objections to the findings of the TA or the proposal, having regard to LDF policies PMD9, PMD10, PMD11 and paragraphs 108, 109 and 111 of the NPPF.

- 6.14 The application also includes a Travel Plan to encourage staff and visitors to use a range of transport options for visiting and leaving the site, including a cycle to work scheme; cycle and motorcycle parking; travel information boards; staff welcome packs; car sharing; walking measures; and public transport promotion. The Council’s Travel Plan Co-ordinator raises no objection subject to some amendments to the travel plan and subject to the travel plan forming a planning obligation in the s106. Accordingly, the proposed Travel Plan has been considered acceptable having regard to LDF policy PMD10, and paragraph 111 of the NPPF.
- 6.15 The Council’s draft Parking Standards seek 1 vehicle parking space per 150 sqm as well as certain criteria for cycle, powered two wheels and disabled parking. A comparison of the parking provision offered with the consented permissions and this current application is provided below:

	Parking Provision	
	12/00862/OUT & 17/00587/REM	Current Application
HGV Parking	100	84
Car Parking	332	327
Cycle Parking	160	50

- 6.16 For HGV parking the Council’s draft Parking Standards identifies that HGV parking provision should be based on the operational requirements of the development. The proposal includes 99 HGV docking/loading bays and 84 HGV parking spaces.
- 6.17 The proposed development represents an improvement in parking terms when compared to the extant permission and with regard to the Council’s draft parking standards. The Council’s Highways Officer raises no objections to the application on parking grounds and having regard to LDF policies PMD8 and paragraph 107, 108 and 110 of the NPPF.

IV. FLOOD RISK AND DRAINAGE

- 6.18 The western and south western part of the site is located in a high risk flood zone [Flood Zone 3a] as identified on the 'Flood Maps for Planning' Government website and as set out in the PPG's 'Table 1 - Flood Zones' but is within an area protected by flood defences. This means that part of the site is subject to a high probability of flooding and the PPG provides guidance on flood risk and vulnerability. The proposal would fall within the 'Less Vulnerable' use category of the PPG's 'Table 2 - Flood Risk Vulnerability Classification' where development is 'appropriate' for this flood zone as identified in the PPG's 'Table 3 – Flood Risk Vulnerability and Flood Zone Compatibility' table.
- 6.19 The Sequential Test is applicable and the PPG advises states that 'when applying the Sequential Test, a pragmatic approach on the availability of alternatives should be taken'. In assessing the wider area there are large areas of allocated employment land within Purfleet and West Thurrock but this proposal requires a large site and almost all of the locations in these areas are likely to be already occupied by existing development. One of the key reasons for the developing this site for a storage and warehouse distribution use is due to its location adjacent to the strategic road network within close proximity of the junction 30 of the M25/A13 interchange. As the site is not within any allocated LDF policy designation there are no objections in principle to the site being developed and clearly this is preferable to developing the nearby Metropolitan Green Belt site, which lies to the north of the A13 in this location. The site, overtime, would be seen in the context of an extension of the neighbouring Purfleet Industrial Estate areas to the south. The extant permission also already permits a similar scale of development upon this site. For these reasons it is considered that the Sequential Test is passed.
- 6.20 The Flood Risk Assessment (FRA) identifies that the ground levels at the site range from 3.9m AOD to 8.06m AOD and the most likely source of flooding would be from surface water flooding. The 'Flood Maps for Planning' Government website identifies the site is an area protected by flood defences. As only part of the site is located in a high risk flood zone safe dry access can be maintained to higher ground levels if a flood event were to occur. A Flood Warning and Evacuation Plan [FWEP] will be needed for implementation including an area for safe refuge. The Council's Emergency Planner has advised that this can be subject to a planning condition.
- 6.21 A detailed surface drainage strategy seeks to use swales, underground attenuation devices and an attenuation basin, which will be maintained and managed by the landowner/future operator. Details of the proposed surface drainage systems shall be subject to a planning condition.

- 6.22 Foul drainage will be connected to the existing sewer network to the east of the site.
- 6.23 Subject to conditions, there are no objections raised from the Environment Agency, Flood Risk Advisor or Emergency Planner and the proposal is therefore considered acceptable with regard to policies CSTP27 and PMD15.

V. ECOLOGY

- 6.24 The site is not within any statutory or non-statutory ecological designations and the site is former landfill which has become naturally regenerated over the passage of time.
- 6.25 The application demonstrates that there have been numerous ecological surveys undertaken at the site over a period of time recently and dating back to 2006. The surveys showed the site was suitable as a reptile habitat and included a low population of common lizards when surveys were undertaken in October 2015. These species were then removed from the site. Clearance works took place in October 2016 when highway works approved through the outline permission [12/00862/OUT] were implemented.
- 6.26 The Ecological Statement explains that the proposed development of the site would result in the loss of existing habitats but the Ecological Statement considers this to be of 'negligible significance' and a range of enhancement and mitigation measures are proposed, which include wildflower grassland margins, mixed shrubs and trees for birds and bat boxes in suitable locations. The Council's Landscape and Ecology Advisor has no objections and the proposal is considered acceptable with regard to LDF policies CSTP19 and PMD7, and subject to the implementation of the mitigation measures stated in the applicant's Ecological Statement.

VI. AIR QUALITY AND NOISE

- 6.27 The current application represents a reduction in floor space compared to the extant permission and similar levels of vehicle activity associated with the proposed use. The applicant's Air Quality Addendum concludes that the proposal would 'not result in significantly different impacts to those identified for the original planning application'.
- 6.28 The applicant's Air Quality Addendum proposes the same mitigation as detailed in the outline permission, which are that HGV's will need to meet Euro VI standards, registration of fleet operator emissions reduction scheme [4 stars or higher], and electric vehicle charging points to be provided in the car park. The Council's Environmental Health Officer has no objections subject to the air quality mitigation

measures being implemented through planning conditions. As such, the proposed development is considered acceptable with regard to LDF policy PMD1 and paragraph 181 of the NPPF.

- 6.29 In terms of noise, a Noise Assessment has been provided with the application. The construction of the development would result in an increase in noise from the current baseline noise levels from this current undeveloped site. A Construction Environmental Management Plan [CEMP] can be conditioned to control noise levels during the construction of the development.
- 6.30 For the operational use of the site the proposal seeks permission to operate on a 24 hour basis. Noise from the operational use would involve vehicle movements including HGVs and private staff vehicles, noise from plant and equipment and noise outside the site from road traffic flows using the surrounding road network.
- 6.31 The nearest and most sensitive noise receptors are the residents of properties along the eastern side of Purfleet Road. To mitigate any impact upon the amenities of the occupiers of these residential properties, earthworks in the form a landscaped bund, would be created along with a 2m high barrier positioned on the ridge level of the bund. The bund would be landscaped to screen the development and would perform as an acoustic barrier with the Noise Assessment identifying that there would be no significant impact upon these neighbouring residents, which in terms of noise levels would be in accordance with the WHO guidelines for habitable rooms and external private amenity space. As such there would be no adverse impacts on health and quality of life of existing residents and occupiers. The Council's Environmental Health Officer has no objections and subject to mitigation measures being implemented the proposal would accordance with the requirements of policy PMD1 and paragraph 180 of the NPPF.

VII. EFFECT ON NEIGHBOURING PROPERTIES

- 6.32 The nearest neighbouring residential properties are located to the east of the site on Purfleet Road. The principle elevations of these properties are located approximately 68-70m, building to building distance, from nearest points of the proposed buildings which include the three storey car park and the three storey office building. It should be noted that the extant scheme proposes a building in a much closer position towards these residential properties (at approximately 37m between buildings). The landscape bund was also much narrower than the current application. Given the improvements that would be brought forward by the current application there is no objection from the Council's Environmental Health Officer or the Council's Landscape and Ecology Advisor with regard to LDF policy PMD1.

- 6.33 The application includes a Lighting Assessment Report which seeks to provide lighting solutions to protect the nearby residential properties. The measures would include shielding of lamps, tilted lamps, choice of lamination and mounting heights, which are considered acceptable having regard to policy PMD1 and paragraph 180 of the NPPF.
- 6.34 The bellmouth junction is approximately 70m from the nearest residential property, the same as the extant permission, where vehicles would enter and leave the site and this includes the exit only for HGV's that would turn right into Purfleet Road and exit onto London Road at the recently installed road traffic junction. Weight restrictions along Purfleet Road prevent HGVs from turning left from the bellmouth junction into Purfleet Road. Based on the distance from the bellmouth junction to the nearest residential property the proposal would not lead to adverse impact upon nearby residential amenity with regard to LDF policy PMD1.
- 6.35 All other buildings and uses in the area are commercial and are not considered to be adversely affected by the proposal.

VIII. LAND CONTAMINATION AND GROUND WORKS

- 6.36 As the site is former landfill remediation works are required before any development commences on site. From the outline permission [12/00862/OUT], and the conditions attached to that permission, various contamination and remediation strategies have been submitted to and approved by the local planning authority. There are no objections raised by the Council's Environmental Health Officer but conditions relating to the information already approved and any outstanding information from the outline permission [12/00862/OUT] will need to be included in any approval of this application, to accord with the requirements of policy PMD1 and paragraphs 178-179 of the NPPF.

IX. ENERGY AND SUSTAINABLE BUILDINGS

- 6.37 The applicant's BREEAM Pre-Assessment Report sets out a strategy for achieving a BREEAM 'excellent' rating to comply with the requirements of policy PMD12 and will be subject of a planning condition.
- 6.38 The applicant's Energy Report identifies measures to reduce carbon emissions including the use of a photovoltaic system on the roof, LED lighting and heating and hot water systems to meet with the policy requirements of LDF policy PMD13 and will be subject to a planning condition.

X. VIABILITY AND PLANNING OBLIGATIONS

- 6.39 Policy PMD16 of the Core Strategy indicates that where needs would arise as a result of development the Council will seek to secure planning obligations under Section 106 of the Town and Country Planning Act 1990 and any other relevant guidance. The policy states that the Council will seek to ensure that development contribute to proposals to deliver strategic infrastructure to enable the cumulative impact of development to be managed and to meet the reasonable cost of new infrastructure made necessary by the proposal.
- 6.40 Certain LDF policies identify requirements for planning obligations and this depends upon the type of development proposed and consultation responses from the application process.
- 6.41 Following changes in legislation [Community Infrastructure Levy Regulations] in April 2015 the Council produced its Infrastructure Requirement List [IRL] which changed the way in which planning obligations through section 106 agreements can be sought. The changes brought in pooling limitations to a maximum of 5 contributions towards a type or item of infrastructure. The IRL therefore provides an up to date list of physical, social and green infrastructure to support new development in Thurrock. This list is bi-annually reviewed to ensure it is up to date. The IRL applies a number of different development scenarios.
- 6.42 The outline permission [12/00862/OUT] was determined prior to the Community Infrastructure Levy Regulations legislation changes but secured a number of planning obligations and similar planning obligations are offered with this application, which include a travel plan, vehicle monitoring scheme and bus service contributions, as set out below. Since this outline permission various highway works have taken place to Purfleet Road and London Road as explained in paragraph 1.8 of this report. These works were part of the s106 legal agreement to the outline permission and were also subject to works under s278 legal agreement to the Highways Act.
- 6.43 The following planning obligations are offered:
- Travel Plan – submission for approval, implementation and review of a Travel Plan. Payment of the Council’s Travel Plan review fees of £500;
 - Vehicle Monitoring Scheme – submission for approval, implementation and maintenance of a Vehicle Monitoring Scheme. Carrying out of relevant corrective highways measures;
 - Bus Services Contribution – financial contribution of £150,000 (indexed) three months prior to occupation and a further contribution of £150,000 (indexed) on occupation of 50% of the floorspace.

XI. SUSTAINABILITY

- 6.44 As part of the planning balance consideration has to be given to the Environmental, Social and Economic objectives as outlined in paragraph 8 of the NPPF with all three needing to be satisfied for the 'presumption in favour of sustainable development' to apply.
- 6.45 For the economic objectives the proposal would create employment opportunities for the construction and operational phase of the development. The operational phase would lead to economic benefits to the local economy. For the social and economic objective the proposal would lead to employment opportunities for local people and inter-related social opportunities. For the environmental objective the proposal would lead to new development that would be considered in the context of an extended part of the Purfleet Industrial Area to the west. The design of the proposed development and its impact upon the surrounding area along is acceptable along with an acceptable highway access and on site parking provision. The development would incorporate surface water without giving rise to flooding elsewhere and a landscaping, including a landscape bund and noise barrier to safeguard nearby residential amenities.

XII. OTHER MATTERS

- 6.46 Planning condition 13 of the outline permission [12/00862/OUT] required an investigation into presence of any on site archaeology, which involved a trench evaluation and open area excavation. No archaeology was found and the condition was discharged. Through this current application the Essex County Council Archaeologist advises there are no requirements for any further archaeological conditions.

7.0 CONCLUSIONS AND REASONS FOR APPROVAL

- 7.1 The proposed development would lead to provision of a new storage and distribution centre which would lead to employment opportunities and economic benefits for the area. The principle of development has been established through the grant of earlier permissions, and the current scheme represents a reduced form of development when compared to the extant scheme. Compared against the extant scheme, the current proposal is favourable. The location provides good access links to the strategic highway network, meaning that HGVs would not travel through residential areas to connect to the M25. The design of the building and its appearance in the surrounding would overtime appear as an extension to the existing industrial location to the south of London Road. All other material considerations are considered acceptable and subject to planning conditions for mitigation where necessary and the provision of planning obligations the application is recommend for approval.

8.0 RECOMMENDATION

8.1 Approve, subject to the following:

- i) the completion and signing of an obligation under s.106 of the Town and Country Planning Act 1990 relating to the following heads of terms:
- Travel Plan – The submission for approval, implementation and review of a Travel Plan. Payment of the Council’s Travel Plan review fees of £500;
 - Vehicle Monitoring Scheme – The submission for approval, implementation and maintenance of a Vehicle Monitoring Scheme. Carrying out of relevant corrective highways measures;
 - Bus Services Contribution [IRL Projects 198 and 378] – A financial contribution of £150,000 (indexed) three months prior to occupation and a further contribution of £150,000 (indexed) on occupation of 50% of the floorspace.
- ii) the following planning conditions:

Standard Time Limit

1. The development hereby permitted must be begun not later than the expiration of 3 years from the date of this permission.

Reason: To comply with Section 91(1) of The Town & Country Planning Act 1990 as amended by Section 51 of the Planning and Compulsory Purchase Act 2004.

Approved Plans

2. The development hereby permitted shall be carried out in accordance with the following approved plans:

Plan Number(s):		
Reference	Name	Received
126726-0180-A	Proposed Plans	20th August 2018
126726-0180	Proposed Plans	14th June 2018
126726-0181-A	Proposed Plans	14th June 2018
126726-0201-B	Proposed Plans	14th June 2018
126726-0203-A	Drainage Layout	14th June 2018
1448A-01	Landscaping	14th June 2018
1448A-02	Landscaping	14th June 2018
1448A-02 SHT 1	Landscaping	14th June 2018

1448A-02 SHT 2	Landscaping	14th June 2018
1448A-02 SHT 3	Landscaping	14th June 2018
1448A-02 SHT 4	Landscaping	14th June 2018
1448A-02 SHT 5	Landscaping	14th June 2018
18-047-EX-001	Proposed Plans	14th June 2018
30824-PL-100A	Location Plan	14th June 2018
30824-PL-201	Proposed Site Layout	14th June 2018
30824-PL-202	Proposed Floor Plans	14th June 2018
30824-PL-203	Proposed Floor Plans	14th June 2018
30824-PL-204	Proposed Elevations	14th June 2018
30824-PL-205	Roof Plans	14th June 2018
30824-PL-208	Proposed Elevations	14th June 2018

Reason: For the avoidance of doubt and to ensure the development accords with the approved plans with regard to policies PMD1 and PMD2 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Materials

3. Prior to the erection of external facing materials details or samples of all materials to be used shall be submitted to and approved in writing by the local planning authority. Where appropriate, these details will include:

- External Cladding
- Feature Band
- External Windows,
- Canopy
- External Loading Doors
- External Personnel Doors
- Eaves/verge flashing
- Roof
- Louvres

The development shall be carried out using the materials and details as approved.

Reason: In the interests of visual amenity and to ensure that the proposed development is integrated with its surroundings in accordance with policy PMD2 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Boundary details

4. The boundary treatments as shown on the approved drawings as listed in condition 2 shall be constructed prior to occupation of the development and shall be retained and maintained as such at all times thereafter, unless otherwise agreed in writing by the local planning authority.

Reason: In order to safeguard the amenities of neighbouring occupiers and in the interests of the visual amenity of the area as required by policies PMD1 and PMD2 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Landscaping Implementation

5. Within the first available planting season (October to March inclusive) following the occupation of the development the landscaping works as shown on the approved plans as listed in condition 2 and the specifications stated in the relevant submission documents. If within a period of five years from the date of the planting of any tree or plant, or any tree or plant planted in replacement for it, is removed, uprooted or destroyed or dies, or becomes, in the opinion of the local planning authority, seriously damaged or defective, another tree or plant of the same species and size as that originally planted shall be planted at the same place, unless the local planning authority gives its written consent to any variation.

Reason: To secure appropriate landscaping of the site in the interests of visual amenity and the character of the area in accordance with policies CSTP18 and PMD2 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Realignment of London Road A1306 left in access

6. Prior to occupation of the development hereby permitted details of the proposed realignment of London Road A1306 left in access, including signage have been submitted to and approved by the local planning authority. The proposed realignment of London Road A1306 left in access shall be implemented as approved prior to first occupation of the development hereby permitted and shall be retained and maintained as such at all times thereafter.

Reason: In the interests of highway safety in accordance with policy PMD9 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Vehicle Parking

7. The development hereby permitted shall not be first occupied until such time as the vehicle parking area shown on the approved plans, including any disabled parking and parking for powered two wheelers, has been hard surfaced, sealed and marked out as shown on the approved plans. The vehicle parking area(s) shall be retained in this form at all times thereafter. The vehicle parking area(s) shall not be used for any purpose other than the parking of vehicles that are related to the use of the approved development.

Reason: In the interests of highway safety and to ensure that adequate car parking provision is available in accordance with policies PMD8 and PMD9 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Car Parking Management Plan

8. Prior to first occupation of the development hereby permitted details of how the car park will operate shall be set out in a Car Park Management Plan which shall be submitted to and approved in writing by the local planning authority. The Car Park Management Plan as approved shall be implemented upon occupation of the development.

Reason: In the interests of highway safety and to ensure that adequate car parking provision is available in accordance with policies PMD8 and PMD9 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Cycle parking

9. Prior to the occupation of the development hereby permitted full details of the number, location and design of secure cycle parking facilities shall be submitted to, and approved in writing by, the Local Planning Authority. The approved facilities shall be installed prior to the first occupation of any of the buildings and shall be permanently retained thereafter.

Reason: To reduce reliance on the use of private cars and promote cycling in the interests of sustainability in accordance with policy PMD8 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Surface water drainage

10. Prior to the commencement of development a scheme for the management of surface water shall be submitted to and approved in writing by the Local Planning Authority. The submitted scheme shall include the following:

- confirmation that flows can be accommodated within the receiving sewer system;
- details of the volume of storage required for the 1 in 100 year storm inclusive of climate change;
- utilisation of sustainable drainage techniques for the storage of surface water flows;
- confirmation of who shall be responsible for the maintenance of the scheme.

The approved scheme shall be fully implemented and subsequently maintained in accordance with any timing / phasing arrangements embodied within the scheme, or within any other period as may subsequently be agreed in writing by the Local Planning Authority.

Reason: To ensure the incorporation of an appropriate drainage scheme and to avoid pollution of the water environment and to minimise flood risk in accordance with policies PMD1 and PMD15 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Surface Water Infiltration

11. No infiltration of surface water drainage from hard paved surfaces into the ground is permitted other than with the express written consent of the Local Planning Authority, which may be given for those parts of the site where it has been demonstrated that there is no resultant unacceptable risk to controlled waters.

Reason: To protect the water environment to avoid pollution of the water environment and to minimise flood risk in accordance with policies PMD1 and PMD15 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Flood Warning and Evacuation Plan [FWEP]

12. Prior to the first occupation of the development hereby permitted a Flood Warning and Evacuation Plan [FWEP] for the development shall be submitted to and approved in writing by the local planning authority. The approved measures within the Plan shall be implemented, shall be made available for inspection by all users of the site and shall be displayed in a visible location all times thereafter.

Reason: To ensure that adequate flood warning and evacuation measures are available for all users of the development in accordance with policy PMD15 of the adopted Thurrock LDF Core Strategy and Policies for the Management of

Development [2015].

Ecology Mitigation

13. The proposed the mitigation and ecological enhancement measures contained within the 'Ecological Statement Rev C' which is attached to and forms part of this permission shall be implemented within three months following occupation of the development, unless otherwise agreed in writing with the local planning authority.

Reason: In order to ensure that the interests of ecology and biodiversity or protected species are addressed in accordance with policy PMD7 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Air Quality Mitigation

14. Prior to the first occupation of the development hereby permitted the air quality mitigation measures as identified in the 'Air Quality Addendum' dated June 2018 shall be implemented and the air quality mitigation measures, as installed, shall be retained at all times thereafter.

Reason: To ensure there is no adverse impact upon air quality in the area in accordance with Policy PMD1 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Noise Mitigation

15. Prior to the first occupation of the development hereby permitted the noise mitigation measures as identified in the 'Environmental Noise Assessment of a Proposed Industrial Development' dated 14 June 2018 shall be implemented and the noise mitigation measures, as installed, shall be retained at all times thereafter.

Reason: To protect the amenities of the nearby occupiers from nearby noise sources in accordance with Policy PMD1 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Contamination and Remediation

16. Prior to the first occupation of the development hereby permitted the contamination and remediation mitigation measures as approved through the details contained within application 16/00217/CONDC shall be implemented, unless otherwise agreed in writing by the local planning authority.

Reason: To protect the environment and to avoid pollution of the water environment with policy PMD1 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Verification Report

17. Prior to the first occupation of the development hereby permitted a verification report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. It shall also include any plan (a long term monitoring and maintenance plan) for longer term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification plan. The long term monitoring and maintenance plan shall be implemented as approved.

Reason: To protect the environment and to avoid pollution of the water environment with policy PMD1 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Unforeseen Contamination

18. If, during development, contamination not previously identified is found to be present at the site, then it should be addressed in accordance with the submitted strategy contained within application 16/00217/CONDC except where contamination is of a nature and hazard beyond that encountered during the completed investigation works submitted within application 16/00217/CONDC in which case no further development (unless otherwise agreed in writing by the Local Planning Authority) shall be carried out until the developer has submitted, and obtained written approval from, the Local Planning Authority for an amendment to the remediation strategy detailing how this unsuspected contamination shall be dealt with. Any unexpected contamination and associated remediation and verification measures shall be detailed within the Verification Report.

Reason: To protect the environment and to avoid pollution of the water environment with policy PMD1 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Piling

19. Piling or any other foundation designs using penetrative methods shall not be permitted other than with the express written consent of the Local Planning Authority,

which may be given for those parts of the site where it has been demonstrated that there is no resultant unacceptable risk to groundwater. The development shall be carried out in accordance with the approved details.

Reason: To protect the water environment to avoid pollution of the water environment and to minimise flood risk in accordance with policies PMD1 and PMD15 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Outside Operations

20. There shall be no external storage of goods, machinery, plant or materials on the site, unless otherwise agreed in writing by the Local Planning Authority.

Reason: In the interests of visual amenity and to ensure that the proposed development is satisfactorily integrated within its immediate surroundings in accordance with policy PMD1 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

External Lighting

21. Prior to the first occupation of the development hereby permitted the external lighting mitigation measures as identified in the 'External LED Lighting Assessment Report' dated 1 June 2018 shall be implemented and the external lighting mitigation measures shall be retained at all times thereafter, unless otherwise agreed in writing by the local planning authority.

Reason: To protect the amenities of the nearby occupiers from nearby noise sources in accordance with Policy PMD1 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Ventilation and extract details

22. No external plant or machinery shall be used until details of the ventilation and extraction equipment have been submitted to and approved by the local planning authority. The ventilation and extraction equipment shall be installed prior to first occupation of the development hereby permitted and shall be retained and maintained as such thereafter.

Reason: In the interests of the amenity and to mitigate the impact of development in accordance with by policy PMD1 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

BREEAM

23. The development hereby permitted shall be built to a minimum standard of 'Excellent' under the Building Research Establishment Environmental Assessment Method (BREEAM). Within 4 months of the first use of any of the building(s) a copy of the Post Construction Completion Certificate for the building(s) verifying that the 'Excellent' BREEAM rating has been achieved shall be submitted to the Local Planning Authority.

Reason: To ensure that the development meets the objectives of energy efficiency in new building design and construction set out in Policy PMD12 of the adopted Thurrock Local Development Framework Core Strategy and Policies for the Management of Development [2015].

Renewable Energy

24. Prior to the first occupation of the development hereby permitted the energy and sustainability mitigation measures as identified in the 'Energy and LZC Strategy' dated 11 June 2018 shall be implemented and the mitigation measures shall be retained at all times thereafter.

Reason: To protect the amenities of the nearby occupiers from nearby noise sources in accordance with Policy PMD1 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Construction Environmental Management Plan [CEMP]

25. No construction works shall commence until a Construction Environmental Management Plan [CEMP] has been submitted to and approved in writing by the local planning authority in writing. The CEMP should contain or address the following matters:
- (a) Construction hours and delivery times for construction purposes,
 - (b) Hours and duration of any piling operations;
 - (c) Vehicle haul routing in connection with construction, remediation and engineering operations;
 - (d) Wheel washing and sheeting of vehicles transporting loose aggregates or similar materials on or off site;
 - (e) Details of construction access;
 - (f) Location and size of on-site compounds [including the design layout of any proposed temporary artificial lighting systems];
 - (g) Details of any temporary hardstandings;

- (h) Details of temporary hoarding/boundary treatment;
- (i) Method for the control of noise with reference to BS5228 together with a monitoring regime;
- (j) Measures to reduce vibration and mitigate the impacts on sensitive receptors together with a monitoring regime;
- (k) Dust and air quality mitigation and monitoring;
- (l) Water management including waste water and surface water discharge;
- (m) Method statement for the prevention of contamination of soil and groundwater and air pollution, including the storage of fuel and chemicals;
- (n) A Site Waste Management Plan;
- (o) Ecology and environmental protection and mitigation;
- [o] Community liaison including a method for handling and monitoring complaints, contact details for site managers;
- [p] Details of security lighting layout and design; and
- [q] A procedure to deal with any unforeseen contamination, should it be encountered during development.

Works on site shall only take place in accordance with the approved CEMP.

Reason: In order to minimise any adverse impacts arising from the construction of the development in accordance with policy PMD1 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Travel Plan

26. Prior to the first occupation of the development hereby permitted, a Travel Plan shall be submitted to and agreed in writing with the local planning authority. The Travel Plan shall include detailed and specific measures to reduce the number of journeys made by car to the development hereby permitted and shall include specific details of the operation and management of the proposed measures. The details to be agreed shall also include how the Travel Plan will be implemented and the timescales and responsibilities for its monitoring and review. The measures shall be implemented upon the first occupation of the building hereby permitted and shall be permanently kept in place unless otherwise agreed in writing with the local planning authority.

Reason: To reduce reliance on the use of private cars, in the interests of sustainability, highway safety and amenity in accordance with Policy PMD10 of the adopted Thurrock LDF Core Strategy and Policies for the Management of Development [2015].

Positive and Proactive Statement

The Local Planning Authority has acted positively and proactively in determining this application and as a result, the Local Planning Authority has been able to grant planning permission for an acceptable proposal, in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.
